PROFESSIONAL EXPERIENCE

Freelance Graphic Designer & Brand Specialist | January 2023 – Present

Delivered logos, brand identities, marketing materials, social media campaigns, and digital assets for clients and personal products, developing cohesive visual systems that improved brand consistency across digital and print applications. Managed projects from concept development and design exploration through revisions, production, and final delivery.

Design Technologist, Nick Frost Innovations | 2024 – Present

Developed visual assets and branding for digital products and communications, creating marketing graphics, promotional materials, and presentation designs. Translated product requirements into cohesive visual solutions while maintaining consistency across digital interfaces, brand assets, and marketing communications.

Lead Designer, (NACOSS), Department of Computer Science FUOYE | 2025 – Present

Led the visual design direction for departmental communications, student programs, and events, producing branded flyers, banners, social media campaigns, presentations, and promotional materials. Established consistent visual standards across departmental initiatives and strengthened the organization's visual identity across digital and print communications.

Co-Lead, Google Developer Group (GDG), FUOYE | 2026 – Present

Co-led the visual design and creative direction for GDG FUOYE activities, developing event branding, promotional graphics, social media content, presentations, and other digital assets. Supported workshops, meetups, and hackathons by creating consistent visual materials that strengthened communication and engagement across the developer community.

President, Department of Computer Science (NACOSS), FUOYE | 2026 – Present

Lead the Nigeria Association of Computer Science Students (NACOSS), overseeing organizational activities, programs, and strategic initiatives while coordinating executive operations and representing the association at institutional and external forums. Drive the planning and execution of student-focused programs and initiatives, coordinating teams and stakeholders to deliver projects that support student development and engagement.

Graphic and Visual Design Intern, SIM Computer Institute | 2020 – 2022

Collaborated with senior designers to create digital visuals, marketing materials, social media graphics, and print-ready artwork for client and organizational projects. Contributed to concept development, revisions, and final production while applying professional design workflows to deliver consistent visual content for promotional and brand communication needs.
