

NICHOLAS BENSON

FULL-STACK SOFTWARE DEVELOPER | SOFTWARE ENGINEER

Email: bensonnicholas206@gmail.com | Portfolio: <https://nicholasbenson.cv>

LinkedIn: <https://www.linkedin.com/in/nickfrostcode> | Github: <https://github.com/nickfrostcode>

PROFESSIONAL SUMMARY

Full-stack software developer and engineer with a strong focus on frontend development and user experience. Experienced in designing, building, and maintaining modern web applications and digital products from concept to deployment. Focused on developing scalable, reliable, and intuitive software that solves real-world problems.

TECHNICAL SKILLS

Frontend Development: TypeScript, JavaScript, React, Next.js, Tailwind CSS, HTML5, CSS3, Responsive Design, Accessibility, Performance Optimization.

Backend Development: Node.js, Fastify, Go (Golang), REST APIs, Authentication, API Integration, Server-Side Development.

Database & Data: PostgreSQL, Supabase, SQL, Database Design, Schema Design, Row-Level Security, Data Modeling, Migrations

Development Tools: Git, GitHub, npm, Vite, Docker, Postman, Playwright, Sentry, Chrome DevTools.

Web Technologies: JSON, WebSockets, Webhooks, PWA, Browser APIs, Web Performance, SEO, HTTP/HTTPS.

Soft Skills: Leadership, Problem Solving, Project Management, Client Communication, Time Management, Creative Thinking, Attention to Detail.

PROFESSIONAL EXPERIENCE

Full-Stack Software Developer

Independent / Freelance | January 2023 – Present

- Developed and deployed full-stack web applications from concept to production.
- Built responsive interfaces using React, Next.js, TypeScript, and Tailwind CSS.
- Developed backend APIs and services with Node.js, Fastify, and Go.
- Designed PostgreSQL databases, authentication, and secure data systems.
- Managed testing, deployment, monitoring, debugging, and maintenance.

Selected Software Projects

Enque – Queue Management Platform • <https://enque.live>

- Built and deployed a full-stack queue management platform for medical and service organizations, supporting digital queue creation, registration, and real-time queue tracking.
- Implemented offline-first functionality, unique user identification, notifications, and reusable organization-based queue workflows.

NicksPay – Digital Payment Platform · <https://nickspay.com.ng>

- Built a multi-tenant payment platform for student departments and organizations, supporting configurable payment flows and transaction processing.
- Designed reusable architecture with PostgreSQL, secure data isolation, and third-party payment gateway integration.

Ttenda – Smart Attendance Management System · <https://ttenda.vercel.app>

- Developed a location-based attendance platform designed to reduce attendance fraud through location verification and automated attendance records.
- Implemented server-side validation and database workflows for secure attendance processing.

UniScore – AI University Screening Calculator · <https://uniscore.vercel.app>

- Built a configurable screening calculator that automates admission score computation across different university requirements.
- Developed an Artificial Intelligence calculation engine, allowing scoring formulas to be modified without changing application logic.

EDUCATION

- **Bachelor of Science in Computer Science**
Federal University Oye-Ekiti | Nigeria | Expected Graduation: 2027

AWARDS & ACHIEVEMENTS

- Computer Science Developer of the year – Federal University Oye Ekiti (2026).
- Google Developer Group Co-lead – Federal University Oye Ekiti (2026).
- President, Department of Computer Science FUOYE – Federal University Oye Ekiti (2026).
