PROFESSIONAL EXPERIENCE

Independent & Freelance Software Developer / Graphic Designer | January 2023 – Present
Develop and maintain web applications, digital products, and brand identities for clients and personal projects, combining full-stack development, frontend engineering, visual design, and branding. Manage projects from concept and requirements through design, development, testing, deployment, and final delivery.

Founder, Software Engineer & Design Technologist, Nick Frost Innovations | 2024 – Present
Build digital products and full-stack solutions while developing their visual identities, interfaces, and marketing assets. Handle frontend and backend development, APIs, databases, reusable components, branding, and visual communication across the product lifecycle.

Lead Designer, (NACOSS), Department of Computer Science FUOYE | 2025 – Present

Lead visual design for departmental communications, programs, and events while contributing to digital initiatives. Create branded campaigns, social media graphics, presentations, and digital assets while establishing consistent visual standards across departmental platforms and communications.

Co-Lead Google Developer Group (GDG), FUOYE | 2026 – Present

Co-lead developer and design initiatives at GDG FUOYE, organizing technical workshops, meetups, coding sessions, and hackathons focused on software development and emerging technologies. Support student developers and designers through practical learning, technical collaboration, and industry-relevant tools and workflows.

President Department of Computer Science (NACOSS), FUOYE | 2026 – Present

Lead NACOSS, overseeing organizational activities, technology initiatives, and strategic programs while coordinating executive operations and representing the association at institutional and external forums. Coordinate teams and stakeholders to deliver initiatives supporting software development, technical education, and student engagement.

Computer Service & Design Intern, SIM Computer Institute | 2018 – 2022

Provided technical support including computer setup, software installation, system configuration, troubleshooting, and basic networking while assisting with digital graphics, marketing materials, and print-ready artwork. Gained practical experience across computer systems, IT operations, and professional design workflows.
